PROFILE

I am a Computer Science graduate and Full-Stack Developer, currently working as a Software Engineer at a US-based company. My approach blends the reliability of backend engineering with the precision of modern frontend interfaces. Building systems that don't just work, but excel under pressure. I prioritize clean, secure data pipelines, and resilient architectures.

SELECTED SYSTEMS

ProSupport Squad

Virtual Assistant Marketplace Platform

End-to-end platform connecting clients with virtual assistants, from verified hiring through active work sessions and billing.

Laravel Blade Stripe Twilio Wise DigitalOcean Cloudflare

Bacolod City Flood Map & Alert System

Real-time Monitoring & Alert System

Delivered real-time geospatial alerts to over 10,000+ residents, reducing emergency response latency by approximately 30%.

React Leaflet Open-Meteo API Node.js Tailwind

DHSUD HOA CDD

Government Enterprise System

Successfully digitized 500+ housing association records, automating 65% of manual registry workflows for the DHSUD Negros Island Region.

React Vue PostgreSQL Django Tailwind

DHSUD ELUPDD

Geospatial Dashboard & AI Analytics

Optimized regional compliance monitoring and geospatial data rendering efficiency by 40%.

Vue Django PostgreSQL Tailwind Leaflet AI

SENTINELS

2nd Best Thesis // RPG System

Awarded 2nd Best Thesis among 50+ innovative engineering entries for technical complexity and real-world relevance.

React Django PostgreSQL Python

EXPERIENCE & EDUCATION

Software Engineer

2025 — PRESENT

US-BASED COMPANY · CONFIDENTIAL

Building and maintaining production web systems for a US-based company — backend services, third-party integrations, and the frontend interfaces on top of them.

Geospatial Systems Engineer

2024

DHSUD

Engineered and deployed an interactive geospatial dashboard (ELUPDD) for regional LGU compliance monitoring. Integrated AI-driven analytics and dynamic choropleth mapping.

Software Engineer Intern

2024

DHSUD

Engineered and deployed a comprehensive registry system (HOA CDD). Implemented offline server architectures and managed cloud media storage pipelines.

BS Computer Science

2022 — 2026

STI WEST NEGROS UNIVERSITY

- Outstanding Freshman (2022-2023)
- Attended Machine Learning Workshop
- Attended Google DevFest

LANGUAGES

Python C++ C# Java JavaScript
PHP

FRAMEWORKS

Django Laravel Tailwind Node.js
Vue React

TOOLS & SERVICES

PostgreSQL Stripe Twilio Wise
DigitalOcean Cloudflare Leaflet
Open-Meteo API Linux Git

CAPABILITIES

- RESTful & Async Architectures
- Cross-Platform Sync
- Relational & NoSQL Scaling

- RBAC & JWT Auth
- Offline-First Environments
- CI/CD & System Ops
